

With this component the flushing function is fully guaranteed. When the vessel is disconnected from the system the system flow remains in function. Airfixcontrol enables an easy yearly precharge check of the Airfix A or D expansion vessel.

DVWG certification applied in combination with Airfix A or Airfix D.

- Complete connector set including shut-off and drain.

Advantages

- For contact with potable water this isolator consists of materials approved by the relevant authorities.
- Integrated vessel draining facility for yearly pre-charge check without vessel removal.
- In closed position the flow remains intact and system remains pressurized.

Technical Specifications

- Maximum water temperature: 70 °C.
- Maximum working pressure: 10 bar.
